XanCloud

Revolutionary IP HD CCTV Experience

Visual Events

Visual simplicity that reveals "best" images for every 1 minute of continuous motion allows finding any past event in seconds.

Audit History

Create user accounts and limit their access to specific cameras, live streaming only or recorded events only. A detailed audit log shows the XanCloud access history.
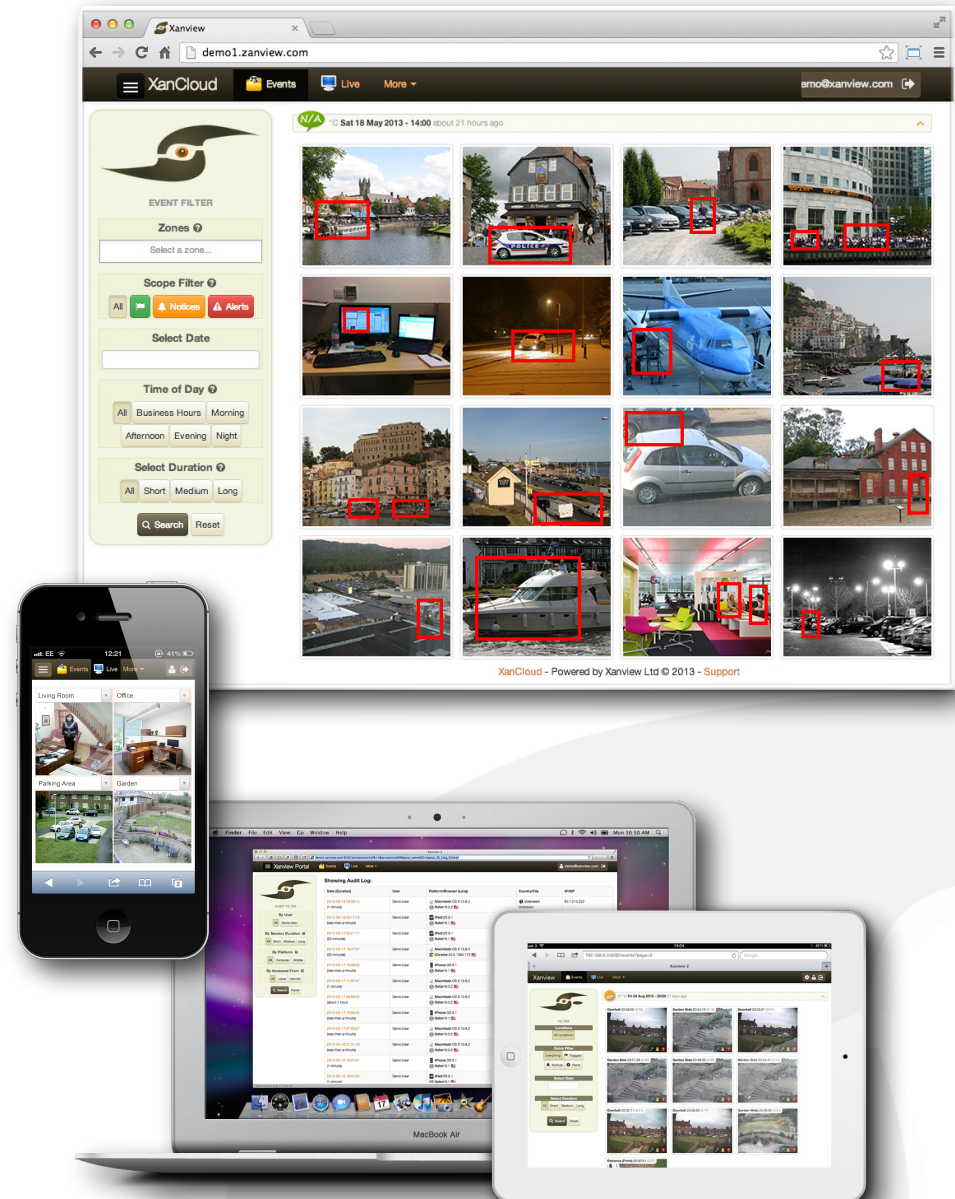

Locations

Connect multiple offices & homes in one XanCloud and view events from different locations side by side.

Compatibility

Simply access any web browser from your PC, Mac, iPhone or any other device - no software download needed.

Audio

Connect analog microphones or utilise IP camera microphones to enjoy video & audio playback.

How It Works

Step 1

Choose a XanBox NVR suitable for your project.

Note: you may also need a PoE switch to power your cameras.

Step 2

Connect the XanBox to the internet via a router or a network switch and the mains power.

Step 3

Visit www.xanview.co.uk/activate to register your XanBox and create a new XanCloud or connect to an existing one.
